Local Health Department monitors travelers and individuals who are close contacts with COVID-19 cases, as appropriate.

Cough, fever, shortness of breath? YES

Individual contacts or presents at health care provider.

Refer to health care provider to discuss symptoms.

Screening at health care provider.

- Doctor determines patient meets prioritization criteria.
- Doctor determines patient does not need testing.

- Health care provider obtains MDSS Investigation ID

- Order test from commercial or hospital laboratory

- Submitter (health care provider) receives results

Send sample to Bureau of Laboratories

Submitter provides result to patient

ENTER POSITIVE RESULTS INTO MDSS

Results are available for the county in which the patient resides and to the submitting provider.

*Testing process for general public, does not specifically apply to health care workers.
