COVID-19 Symptoms: Fever, Cough, Shortness of Breath

**PRIORITY 1**
Ensures most severe cases receive optimal care options and lessens risk of spread in health care facilities.
- Hospitalized patients
- Health care facility workers with symptoms

**PRIORITY 2**
Ensures those at highest risk for severe illness are quickly identified and triaged.
- Patients in long-term care or congregate living facilities with symptoms
- Patients over 65 years with symptoms
- Patients with underlying conditions with symptoms
- First responders with symptoms

**PRIORITY 3**
Reduces community spread and ensures health of essential workers.
- Critical infrastructure workers with symptoms
- People who do not meet any of the above categories with symptoms
- Health care workers and first responders without symptoms
- People with mild symptoms

**PRIORITY 4**
Reduces community spread and ensures health of essential workers, if resources allow.
- Critical infrastructure workers without symptoms (only if testing capacity remains after serving all above patient groups)

**NON-PRIORITY**
- People without symptoms not included in the above categories
